

Pension Funded Status Tracker

April 2021

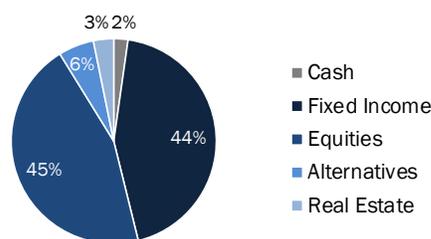

ASSET MANAGEMENT | REPORT

Over April 2021, the average corporate defined benefit pension plan's funded status improved by 1%, from 96% to 97% funded.

- » Within the asset portfolio, risk assets outperformed and were the greatest contributor to the improvement in funding level:
 - While all growth asset classes saw positive performance, large cap U.S. equities performed the best in public markets, while private equity had the highest return of any asset class over the month.
 - As interest rates fell, bond markets saw positive performance across all fixed income sectors.

- » Liabilities witnessed an increase over the month driven by the decrease in interest rates:
 - While interest rates fell, high quality corporate bond spreads were roughly flat over the month.
 - As a result, the effective discount rate decreased by 14bps in April.

Data and Methodology

Conning's Funded Status Tracker is a monthly publication that tracks the performance of the average defined benefit pension plan (the "Plan") of select corporate sponsors comprising a subset of the Russell 3000 Index. The data in this monthly review was reported in the 10-Ks of 563 publicly traded companies from the Russell 3000 index for the 2019 year-end.† Further, the Funded Status Tracker was updated retroactively to reflect published 10-K data for the 2019 year-end. All months of 2020 have been restated to account for the, now known, 2019 year-end position. In addition, the annual tracking of the 10-K data for the years 2015-2019 have been restated to reflect the change of the underlying universe of 658 plans to the current universe of 583 plans. The monitoring of 2019 months will continue until 2020 10-Ks become available, at which point, the same methodology will be applied to include 2020 year-end position with the subsequent 2021 months retroactively updated. Note: these assets may include non-U.S. pension plans. In aggregate, these 583 entities reported \$1.44 trillion in plan assets and \$1.67 trillion in plan liabilities at year end 2019.

The average plan size of the subset of the Russell 3000 index universe outlined above is approximately \$2.47 billion in assets and \$2.86 billion in liabilities, as of December 31, 2019. The Plan's liability is a hypothetical cash flow generated from our proprietary model to reflect a 14-year duration and valuation equivalent to the Plan's PBO on a US GAAP valuation basis as at the end of 2019, but allowed to drift with market conditions during the following year.

It is important to note that asset definitions are not uniform. Conning's analysis of companies' financial statements has found that some firms only report individual stocks as equities, while other firms include stock mutual funds. A similar mixing of types occurs in fixed income. In this analysis, Conning has used the allocations as reported by the companies and not adjusted them. Funded status is the percentage of liabilities that are covered by assets. Interest rate hedge ratio is the dollar duration of assets as a percentage of liability dollar duration.

† For the periods 2015-2019, data from 583 publicly traded companies were used. These companies were selected because they had consistently filed pension data every year for the period from 2015 through to 2019.

LDI Hypothetical Model Disclosures

The proprietary model analysis presented herein is for illustrative purposes only. The model relies on a number of assumptions that are generally stated in the Data and Methodology and within the illustrations. The assumptions can be subject to significant uncertainties and contingencies, and such illustrations may change materially in response to small changes in one or more of such assumptions. The data used for this model was obtained from sources deemed reliable, and then organized by Conning, Inc. and was not audited by any third party. Errors could have occurred in the data, in the calculations, or in the preparation of this analysis. Therefore, information contained in this analysis may not be precise. C: 12846893
